PROFESSIONAL SUMMARY

Software Engineer and Full Stack .NET Developer with hands-on experience building enterprise web applications, RESTful APIs, and scalable backend systems using ASP.NET Core and SQL Server. Experienced in modernizing legacy applications, deploying solutions with Docker and IIS, troubleshooting production environments, and collaborating directly with enterprise customers to deliver reliable software solutions. Strong background in backend development, database design, system integration, and performance optimization, with practical experience mentoring junior developers and contributing to technical decision-making.

PROFESSIONAL EXPERIENCE

Software Engineer | Full Stack .NET Developer Expertflow Egypt | December 2024 - Present

- Developed and maintained enterprise-grade web applications and RESTful APIs using ASP.NET Core, SQL Server, and modern backend development practices.
- Contributed to system architecture and database design for scalable and maintainable business solutions.
- Modernized legacy applications through code refactoring and performance optimization to improve reliability and maintainability.
- Collaborated directly with enterprise customers to gather requirements, troubleshoot production issues, and deliver tailored technical solutions.
- Deployed and maintained applications using Docker and IIS in production environments.
- Integrated enterprise systems with Cisco platforms including CUIC, Finesse, ICM, and VVB.
- Mentored junior developers through code reviews, technical guidance, and debugging support.

Key Achievements:

- Delivered and deployed 6+ enterprise applications used in production environments.
- Supported 6 enterprise customers with deployment, troubleshooting, and ongoing technical support.
- Improved delivery quality and development efficiency by mentoring 3 junior developers.
- Contributed to production stability through proactive issue resolution and system optimization.

Junior .NET Developer

Ministry of Communications and Information Technology | December 2023 - December 2024

- Developed and maintained web applications using ASP.NET Core MVC, C#, SQL Server, HTML5, CSS3, JavaScript, jQuery, and AJAX.
 - Built and enhanced backend functionality, database operations, and responsive user interfaces for internal business systems.
 - Participated in migrating applications from Microsoft SQL Server on Windows environments to MySQL on Ubuntu with Nginx deployment.
 - Collaborated with team members to troubleshoot issues, improve application performance, and implement new business requirements.
-

EDUCATION

Bachelor of Computer Science

Faculty of Computers and Artificial Intelligence, Helwan University | Sep 2019 - May 2023

GPA: 3.04/4.00 (Very Good)

TECHNICAL SKILLS

• Backend & Programming

- C# (Primary)
- .NET Core / ASP.NET Core MVC / Web API
- RESTful API Design & Development
- Authentication & Authorization (JWT)
- Dependency Injection
- Entity Framework Core, Dapper
- LINQ
- MediatR (CQRS / Mediator Pattern)
- Background Job Processing (Hangfire, Quartz.NET)

• Software Design & Architecture

- System Design
- Database Design
- Clean Architecture
- Design Principles (SOLID)
- Design Patterns
- CQRS / Mediator Pattern (MediatR)
- Scalable Application Development
- Legacy System Modernization

• Databases & Caching

- SQL Server
- MySQL
- Redis (Caching)
- Query Optimization

• Front-End Technologies

- HTML5, CSS3, Bootstrap 5
- JavaScript, jQuery, AJAX
- React.js (Familiar)
- Angular (Familiar)

• Messaging & Integration

- RabbitMQ
- Cisco Systems Integration (CUIC, Finesse, ICM, VVB)

• DevOps & Deployment

- Docker
- IIS Deployment
- Azure DevOps (Repos, Pipelines, CI/CD)
- Git & GitHub

• Development Practices & Tools

- Agile Methodology
 - Code Reviews
 - Production Support & Troubleshooting
-

PROJECTS

MonTool (Centralized Monitoring & Alerting Platform)

- Enterprise monitoring platform for Cisco Contact Center environments, providing real-time visibility into infrastructure health, network connectivity, database utilization, call recording integrity, and system alerts.
- **Key Contributions**
 - Developed distributed background services for monitoring Cisco CUIC, VVB, ICM, Finesse, and Eleveo systems.
 - Designed an event-driven architecture using RabbitMQ for scalable trap processing and Redis for real-time dashboard updates.
 - Implemented SNMP v1/v2/v3 monitoring, SSH-based network diagnostics, license monitoring, and automated alert generation.
 - Containerized services with Docker and built email/SMS notification and scheduled reporting solutions.
- **Technologies:**
 - ASP.NET Core, SQL Server, RabbitMQ, Redis, Docker, SNMP, SSH, Background Services, Cisco CCE.

Customer First – Multi-Tenant Customer Experience Platform

- Enterprise customer feedback solution that enables contact centers to collect and analyze customer satisfaction data through Voice, SMS, Email, and Web channels.
 - **Key Contributions**
 - Developed features for a multi-tenant architecture with tenant-specific licensing and isolated customer data.
 - Built REST APIs, reporting modules, real-time dashboards, campaign management, and notification services.
 - Integrated with Cisco CCX/CCE platforms for automated post-call survey workflows and agent synchronization.
 - Contributed to deployment, performance optimization, troubleshooting, and production support activities.
 - **Technologies:**
 - ASP.NET Core MVC, Web API, SQL Server, JavaScript, jQuery, Cisco CCX/CCE, SMTP, Email/ SMS Gateway, IIS.
-
