PROFESSIONAL SUMMARY

Software Engineer and Full Stack .NET Developer with expertise in building scalable applications, designing system architectures and databases, and modernizing legacy solutions. Strong experience in deployment automation, Dockerization, production troubleshooting, and performance optimization. Proven ability to lead junior developers, contribute to architectural decisions, and collaborate directly with enterprise customers to deliver high-quality software solutions.

PROFESSIONAL EXPERIENCE

Software Engineer | Full Stack .NET Developer Expertflow Egypt | December 2024 - Present

Responsibilities:

- Designed and delivered scalable web applications and REST APIs used by enterprise customers.
- Owned system architecture design and database schema modeling for high-performance, maintainable solutions.
- Led modernization of legacy systems by refactoring codebases to improve scalability, maintainability, and reliability.
- Led and mentored junior developers through code reviews, task guidance, and technical decision support.
- Collaborated directly with customers to gather requirements, provide technical consultation, and deliver tailored solutions.
- Diagnosed and resolved production issues to ensure system stability and minimize downtime.
- Managed application deployments using Docker, IIS.
- Integrated enterprise solutions with Cisco systems (CUIC, Finesse, ICM, VVB) and ensured successful QA validation.

Achievements:

- Delivered and deployed 6+ production-grade enterprise applications.
- Supported 6 enterprise customers with ongoing technical and production support.
- Mentored 3 junior developers, improving team delivery efficiency and code quality.
- Improved system reliability through proactive troubleshooting, legacy refactoring, and production support.
- Successfully deployed applications using IIS and Docker-based environments.

Junior .NET Developer

Ministry of Communications and Information Technology | December 2023 - December 2024

- Developed and maintained 5+ web applications using .NET Framework up to 6, C#, ASP.NET Core MVC, SQL Server, HTML5/CSS3, JavaScript, jQuery, and Ajax.
- Migrated web applications from MS SQL Server on Windows to MySQL on Ubuntu with Nginx deployment, improving performance and scalability.

EDUCATION

Bachelor of Computer Science

Faculty of Computers and Artificial Intelligence, Helwan University | Sep 2019 - May 2023

GPA: 3.04/4.00 (Very Good)

TECHNICAL SKILLS

• Backend & Programming

- C# (Primary)
- .NET Core / ASP.NET Core MVC / Web API
- .NET 6–8 (and newer versions)
- Entity Framework Core, Dapper
- LINQ
- JWT Authentication
- MediatR (CQRS / Mediator Pattern)
- Background Job Processing (Hangfire, Quartz.NET)

• Front-End Technologies

- HTML5, CSS3, Bootstrap 5
- JavaScript, jQuery, AJAX
- React.js (Familiar)
- Angular (Familiar)

• Databases & Caching

- SQL Server
- MySQL
- Redis (Caching)

• Software Design & Architecture

- System Design
- Database Design
- Design Principles (SOLID)
- Design Patterns

• DevOps & Deployment

- Docker
- IIS Deployment
- Azure DevOps (Repos, Pipelines, CI/CD)
- Git & GitHub

• Messaging & Integration

- RabbitMQ
- Cisco Systems Integration (CUIC, Finesse, ICM, VVB)

• Development Practices & Tools

- Agile Methodology
 - Jira
 - Code Reviews
 - Production Support & Troubleshooting
-
